## INTRODUCTION

This document provides an overview of the licensing and pricing for StarWind software solutions.

StarWind Software sells storage virtualization and iSCSI storage software. StarWind Server is an advanced, reliable and powerful Open iSCSI SAN software that converts any Windows Server into a SAN. StarWind Enterprise Server also offers additional enterprise-level features including Snapshots and Synchronous Mirroring & Asynchronous Replication. StarWind works over existing Ethernet / IP network and allows users to leverage existing servers and storage resources.

## HOW IS STARWIND LICENSED?

**StarWind Server:** A separate StarWind Server license is required per each server designated as the storage controller where StarWind will be installed. StarWind Server comes with unlimited client connections.

**StarWind Enterprise Server:** StarWind Enterprise Server license is required for the server designated as the primary storage controller and includes unlimited client connections. The Enterprise Server license permits installation on a secondary node for the purpose of mirroring and replication from the primary node. Please note that this license is not meant to allow the use of two active storage servers but only permits an active-passive configuration for configuring replication from the primary to the secondary node.

## LICENSE KEY ACTIVATION

StarWind uses a license key to activate software and add-on features. The licensing mechanism does not require activation over the internet – license keys function independently to authorize the activation of a single StarWind Server license.

## TECHNICAL SUPPORT

### **Free Technical Support**

All customers purchasing product license without ASM can still receive thirty (30) days of free technical support as defined in the End-User Licensing Agreement (EULA) shipped with the product.

Free support is provided via email and the online web site forum on a best-effort basis. The thirty (30) day period starts on the purchase date of product licenses.

### **ASM technical support plans.**

Technical Support is available on a per-year basis. One can purchase the ASM subscription and receive technical support respectively during 1, 2 or 3 years periods. More info available at:
