Solution

StarWind Virtual SAN (vSAN)

"StarWind is an outstanding solution that drastically increased our cloud availability and improved disk I/O."

Jim Crawford,
Data Center Manager

Challenge

Prior to deployment of StarWind Virtual SAN, Cantey Tech Consulting infrastructure comprised single target SANs with VMware ESX as hypervisor. The company was looking for a simple and cost-effective solution that would ensure high availability and improve overall SAN performance.

Solution

Cantey Tech Consulting chose StarWind Virtual SAN as a solution because of its superior performance, ease of management and the value it brings to businesses. StarWind Virtual SAN enhanced the overall SAN performance and ensured high availability for the company's cloud services.

The company also admits great support service which made its experience with StarWind even better.
