StarWind
HYPERCONVERGENCE

CrossRoad Engineers achieved data high availability with StarWind HCI Appliance (HCA)

Problem

The firm needed data high availability and simplify infrastructure management which their existing environment could not provide. Other reviewed by company's IT department solutions required specialized configuration and dedicated management that **CrossRoad Engineers** did not have resources for.

Solution

CrossRoad Engineers have chosen **StarWind HyperConverged Appliance** for its reputation. The solution delivered the required data high availability without breaking company's budget.

The solution also provided the required management simplicity and made company's IT department life easier due to being well supported.

Easy management, thorough support, and required data availability made the solution capable of meeting company's demands despite its limited IT team resources.

About the Company

CrossRoad Engineers is one of central Indiana's leading civil engineering companies. Since its inception in 1995, the firm has established rock-solid reputation in its area. The company designs roads, bridges, and roundabouts together with providing inspection, research, and consulting services on these domains.
