Solution

StarWind Virtual Tape Library (VTL)

"StarWind has provided us with better management and visibility without changing the existing backup infrastructure."

Jammy Cheng,
Company Representative

Challenge

Before StarWind Virtual Tape Library deployment, Innitec was running tape-centric backup environment. The company faced a constantly increasing number of tapes that made its storage extremely inefficient.

So, Innitec wanted to simplify backup environment management without changing it and paying a dime for software licensing and new hardware.

Solution

StarWind Virtual Tape Library (VTL) was the ideal choice for Innitec due to its powerful capabilities in seamlessly streamlining its backup environment without requiring any modifications.

The solution provided neither new hardware purchased nor new employees trained. Also, it allowed avoiding expensive software licensing.

So, thanks to StarWind Virtual Tape Library, the company was able to save both costs and time for building a better backup environment.
