

# Serenity Insurance achieved the required IT infrastructure redundancy with **StarWind HCI Appliance**

## About the company

For 24 years, Serenity Insurance has been providing insurance services in 47 states. It is a unique American agency that specializes in high risk auto insurance. Also, the company offers commercial auto, motorcycle, boat, and trailer insurance services.

## Industry

Insurance

## Geo

USA

## Solution

StarWind HCI Appliance (HCA)

*"Support has been great. All of the reps I have spoken to have been very nice and informative, and always follow up. The setup was a breeze."*

**Alex Hernandez,**  
a company representative

## Challenge

Before StarWind HCI Appliance deployment, Serenity Insurance was running its production on a single aging server. Obviously, such infrastructure could not ensure production high availability.

## Solution

StarWind HCI Appliance was chosen due to positive recommendations on Spiceworks.

Being able to mirror data between nodes, StarWind HCI Appliance delivered the required IT infrastructure redundancy. The resulting solution was deployed as a cost-efficient two-node setup that brought the company's IT department true peace of mind.

There was also no need for buying a separate storage solution: StarWind HCI Appliance has built in one.

Additionally, Serenity Insurance notes the thorough support of the solution. Thanks to StarWind Support Team efforts, there was no event of production downtime so far.
