

StarWind Virtual SAN assisted the National Agency of Project Management in Uzbekistan to build a fault-tolerant and highly-available IT environment

About the Company

National Agency of Project Management under the President of the Republic of Uzbekistan

was established to ensure the rational use of resources during the process of governmental system reformation, economic and social spheres. This agency is also aimed to increase the efficiency and transparency of management over the implementation of governmental programs and public expenditure.

Company Profile

Ministry of State

Problem

The company aimed to assure constant applications' uptime along with 24/7/365 services availability.

Solution

StarWind Virtual SAN provided unbeatable performance of the company's applications and services, reaffirming its reputation of a reliable software-defined storage solution.

Problem

Initially, the company's infrastructure was self-contained, reliable, manageable, however, the agency wanted to ensure 24/7/365 applications uptime. Subsequently, there was a need to create **highly available virtual machines**. Therefore, software-defined storage solution was required to meet the company's requirements.

Solution

StarWind Virtual SAN was preferred to other similar solutions due to the company's satisfactory experience with the product in the past. Deployment of **StarWind Virtual SAN** managed to fulfil the actual needs of the company because this solution creates a fault-tolerant storage pool and ensures unbeatable performance of the applications. Moreover, **StarWind Virtual SAN** has a number of cogent advantages, including optimal distribution of budgets and simplicity in administration of the IT infrastructure, which influences decision-making in favor of StarWind solution.

StarWind has a number of advantages over other products. I've used StarWind earlier and it never failed.
