Problem

The existing tape-centric backup environment become inefficient due to constantly increasing amounts of data to store.

Solution

StarWind Virtual Tape Library streamlined company's backup infrastructure without changing it.

Problem

Before **StarWind Virtual Tape Library** deployment, Innitec was running tape-centric backup environment. The company faced a constantly increasing number of tapes that made its storage extremely inefficient. So, Innitec wanted to streamline and simplify backup environment management without changing it and paying a dime for software licensing and new hardware.

Solution

StarWind Virtual Tape Library was chosen because it could streamline Innitec backup environment without changing it.

The solution required neither new hardware purchased nor new employees trained. Also, it allowed avoiding expensive software licensing.

So, thanks to StarWind Virtual Tape Library, the company was able to save both costs and time for building a better backup environment.

StarWind has provided us with better management and visibility without changing the existing backup infrastructure.
