

Maritime and Offshore Solutions

UNCONVENTIONAL NEEDS, UNCONVENTIONAL SOLUTIONS

Maritime vessels, stations, and other offshore businesses deal with working conditions and demands that are atypical for common organizations. Environmental conditions, considerably remote location, restrained space, and heightened data retention and security regulations create a unique demand for **low-hardware-footprint yet performant-as-if-on-mainland IT infrastructures. Not that many options.**

Rapidly changing network demands onboard maritime vessels always need to be enforced immediately to ensure data compliance. There is also no possibility and it's unrealistic to compile in-house dedicated IT support teams that will effectively cover each unit. The delivery of infrastructure management and support can be challenging, so proactivity and availability are key.

STARWIND ALLOWS EDGE STAND FIRMLY THROUGH VOLATILITY

StarWind offers rock-solid software-defined solutions (SDS) and turnkey hyper-converged infrastructure (HCI) platforms that are feather-light yet reliable beyond expectation. Thanks to tailored architecture, our products take up virtually no space at all (starting with two nodes) while staying effective and resistant in high-temperature, humid, vibrating, and elevated electro-magnetic conditions. Instead of server arrays, choose neat all-flash racks that offer true hyperconvergence with 99.9999% uptime.

Whatever the need for high availability, data security, flexible scalability, and fault tolerance — StarWind ticks every checkbox and for an approachable price.

And with **StarWind ProActive Premium Support**, your environment will be monitored and served by dedicated engineers **24/7/365**, ready to aid you instantly and checking that no unwanted issues occur.

Choose StarWind Virtual SAN or HyperConverged Appliance to become the impeccable base for tying your diverse infrastructure into a unified resilient environment that will stand up to any production or IT fortification demand. StarWind Software is a great companion to the world's toughest industries, proved by our experience. Schedule a free live demo and make sure of it for yourself!
